

Programs for Youth

As part of our investment in our community, Boone REMC offers several programs throughout the year to educate students about the electric cooperative industry and to support their creativity and community spirit.

Indiana Electric Cooperative Page Day

High school students learn about daily activities that take place at the Indiana Statehouse during the legislative session and take part in a mock bill activity.

Camp Kilowatt*

Incoming seventh graders enjoy traditional summer camp activities at Camp Tecumseh such as canoeing and horseback riding, while learning about electrical safety, energy, and careers at electric co-ops.

Indiana Youth Tour to Washington, D.C.*

This week-long trip for incoming high school seniors includes visits to Gettysburg, Arlington National Cemetery, Smithsonian museums, a night cruise on the Potomac River, meeting legislators, and learning about cooperatives.

Cooperative Calendar of Student Art Contest

Students in grades K-12 are encouraged to submit artwork to illustrate the annual Cooperative Calendar of Student Art. Along with having their artwork featured in the statewide calendar, winners receive cash prizes.

Youth Power and Hope Awards*

This program honors fifth-eighth graders for their volunteerism and acts of kindness in the community.

Annual Meeting Scholarships*

Boone REMC awards post-secondary scholarships to students who are dependents or legal wards of Boone REMC members through a random drawing at the annual meeting each spring.

Other Educational Opportunities

4-H Electric Workshops

Boone REMC hosts workshops each year to help 4-H Electric participants learn fundamentals of electricity in order to complete their projects.

Safety Demonstrations

Boone REMC provides demonstrations on electrical safety for classes or other student groups upon request. Classes also are invited to come to the co-op for a tour and to learn about electricity, safety, and co-op careers.

**Household must receive electricity from Boone REMC to be eligible*
